

WORKING PARTY WEEKENDS – The result

The old wooden fence around the boat park was in a very rickety state and offered absolutely no resistance to the thieves who removed our rescue boat through the fence last year! The maintenance of the fence is the responsibility of our landlords, RMBC, but they were showing absolutely no signs of doing anything so we did it ourselves!

Question: How many men does it take to carry an 8ft by 9ft steel palisade fencing panel?

Answer: At least six – they are b..... heavy!

Can we fix it?

Yes we can!

Message from the Commodore: Can I give a really big thank you to everybody who contributed to completing one of the biggest tasks the club has undertaken for many a year. It was thanks to a large bunch of members that we have finally got a secure fence to the boat park. Lots of you turned up to lend a hand to erect the steel fencing - too many to list. There were some testing times and we made a slow start when the fencepost supplier let us down. But with grit and determination Ulley Sailing Club (YES! You lot...) all pulled together and the task was completed in time for the new season. Brilliant.....!
