

Do you want ice with that? Christmas 2011

For those of you who haven't been down to the club for a while, the lake froze over in mid December and it remained solid for several weeks. With the advent of the milder weather the hard water has now become somewhat softer and sailing can be undertaken without thinking of that epic romantic disaster film starring Kate Winslet and Leonardo DiCaprio.

The water level is now at the 'normal' operating level and should remain so in perpetuity. The beach to the left hand side of the slipway is now under water, providing suitable shallows for launching. Please try to keep the slipway clear of trolleys and boats and please think of other members and the public who need to use this area too. It may be necessary to drag your launch trolley and boat into the shallows to keep clear of the slipway.
